

ProTect S

Optimises sheep performance on grain.

- ✓ DROUGHT LOT
- ✓ FEEDLOT
- ✓ SUPPLEMENTARY FEEDING
- ✓ WEANING

ProAgni ProTect® S pellet is designed to be fed with cereal grain supplements for use in feedlots and drought lots, supplementary feeding or weaning.

Adding ProTect S to an animal's diet has the potential to increase growth rates and decrease the time it takes to reach market specifications.

Why use ProTect S?

- Provides buffering against lactic acidosis
- Helps livestock reach genetic potential for increased production
- Meets increasing demand for antibiotic free meat
- Reduces methane emissions

ProTect S contains

- Acid Buf, a highly effective rumen buffer, containing a pure source of bio-available minerals for rumen efficiency
- Optiwise® a patent pending additive of organic and inorganic bio-available minerals, trace elements, vitamins, probiotic extracts, bioactives and antioxidative compounds, for maximising animal health and minimizing energy waste
- Proven methane-mitigating ingredients; including one certified by the Carbon Trust.

Introducing ProTect S to your animal's diet

Include ProTect S prior to the commencement of any feeding program. Sudden introduction may evoke some sorting behaviour, generally this is overcome with time.

How do I use ProTect S?

Mix the pellet into the grain ensuring even distribution throughout the ration. For best results use a mixer feed wagon. Alternatively, add the prescribed concentration while auguring grain, taking care to achieve accurate grain flow rates.

- Free from urea and hormones
- Free from Lasalocid and Monensin
- Nil withholding period, nil export slaughter intervals
- Feed only to sheep
- Do not feed wet, mouldy products to any animal

CAUTION: Introducing grain to your sheep requires a good induction phase to minimise the risk of gastrointestinal upsets. Before introducing grain, speak to your animal nutritionist or visit proagni.com/sheepinduction

Nutrient Analysis

Nutrient Values:

Nutrient name	Typical analysis	Unit of measure
Protein, Crude	8	%
MJ ME ruminant	5.75	me/kg

Macro minerals:

Nutrient name	Typical analysis	Unit of measure
Calcium	7.05	%
Phos. Total	0.52	%
Sodium	1.1	%
Potassium	0.7	%
Magnesium	1.28	%
Sulphur	2.2	%

Micro minerals:

Nutrient name	Typical analysis	Unit of measure
Manganese	665	mg/kg
Iron	160	mg/kg
Copper	7	mg/kg
Zinc	1200	mg/kg
Selenium	1.2	mg/kg
Cobalt	15	mg/kg
Iodine	15	mg/kg

Vitamins:

Vitamin D3	18	kiu/kg
Vitamin A	150	kiu/kg
Vitamin E	6000	mg/kg

ProTect S dose rate:

Paddock Grain: Supplementary Feeding 25kg Per tonne of ration (2.5%)	Feedlot 50kg Per tonne of ration (5%) (No fibre needed in well managed feedlot)	Weaning 50kg Per tonne of ration (5%) (Download your Weaning Protocol https://proagni.com/sheepinduction/)

ProAgni sheep nutrition range

Pelletised feed additives and loose lick powders for use in supplementary feeding programs 365 days a year. ProAgni products are free from all antibiotics. Packaged in 25kg bags, 1 tonne bags or bulk.

Situation	Product	Form	Dose Rate
Grazing on dry feed and stubbles	ProDry	Powder	80g/hd/day <i>*Loose lick powders are moisture resistant.</i>
Grazing green feed and forage crops	ProGreen		
Optimised performance on Brassic and Canola	ProGreen HiThi		
Cows approaching parturition	ProMark		

Storage

Store bags off the ground in a dry place out of direct sunlight and away from possible pests and insects. Store below 30C. Best used within 6 months of date of manufacture.
