

ProTect S Wean

A complete feed for early weaning lambs

ProAgni

✓ EARLY WEANING

ProAgni® ProTect™ S Wean is a high protein crumbed feed for use during early weaning of lambs. Designed for ease of digestion and providing nutritional support, when fed to young animals transitioning from milk to grain or grass based diets.

Why use ProTect S Wean?

- Provides high protein, high energy nutrition
- Provides buffering against lactic acidosis
- Helps livestock reach genetic potential for increased production
- Meets increasing demand for antibiotic free meat

ProTect S Wean contains

- Plant proteins including bypass and rumen degradable forms of high quality protein
- Powdered milk, a high protein, energy and fat source
- Acid Buf, a highly effective rumen buffer, containing a pure source of bio-available minerals for rumen efficiency
- Optiwise® a patent pending additive of organic and inorganic bio-available minerals, trace elements, vitamins, probiotic extracts, bioactives and antioxidative compounds, for maximising animal health and minimizing energy waste

How do I use ProTect S Wean?

ProTect S Wean is a crumbed feed, to be fed directly to lambs as part of an early weaning protocol.

Supply to lambs using feed trough or trail feeding.

Provide access to adlib cereal hay and cool, clean water. Introduce ration by feeding 75g per head, fed twice a day. Each day increase ration by 25g per head per feed until ad lib consumption is achieved.

Feed ProTect S Wean to lambs for 14 to 21 days, or until lambs reach at least 15kg. Following early weaning, lambs can transition to a grain-based diet containing ProAgni ProTect™ S, or high quality pastures. Download the protocol from the ProAgni website.

- Free from urea and hormones
- Free from Lasalocid and Monensin
- Nil withholding period, nil export slaughter intervals
- Feed only to lambs
- Do not feed wet, mouldy products to any animal

CAUTION: Introducing grain to your sheep requires a good induction phase to minimise the risk of gastrointestinal upsets. Before introducing grain, speak to your animal nutritionist or visit proagni.com/sheepinduction

Nutrient Analysis

Nutrient Values:

| Nutrient name | Typical analysis | Unit of measure |
|----------------|------------------|-----------------|
| Protein, Crude | 22.85 | % |
| MJ ME ruminant | 12.88 | mj/kg |

Macro minerals:

| Nutrient name | Typical analysis | Unit of measure |
|---------------|------------------|-----------------|
| Calcium | 0.8 | % |
| Phos. Total | 0.65 | % |
| Sodium | 0.19 | % |
| Potassium | 1.13 | % |
| Magnesium | 0.46 | % |
| Sulphur | 0.62 | % |

Micro minerals:

| Nutrient name | Typical analysis | Unit of measure |
|---------------|------------------|-----------------|
| Manganese | 66 | mg/kg |
| Iron | 130 | mg/kg |
| Copper | 8.8 | mg/kg |
| Zinc | 100 | mg/kg |
| Selenium | 0.5 | mg/kg |
| Cobalt | 0.75 | mg/kg |
| Iodine | 0.75 | mg/kg |

Vitamins:

| | | |
|------------|-----|--------|
| Vitamin D3 | 0.9 | kiu/kg |
| Vitamin A | 7.5 | kiu/kg |
| Vitamin E | 300 | mg/kg |

ProAgni sheep nutrition range

- ✓ Pelletised feed additives and loose lick powders for use in supplementary feeding programs 365 days a year. **ProAgni products are free from all antibiotics. Packaged in 25kg bags, 1 tonne bags or bulk.**

| Situation | Product | Form | Dose Rate |
|--|-----------|--------|--|
| Grazing on dry feed and stubbles | ProDry | Powder | Sheep 20g/hd/day <i>*Loose lick powders are moisture resistant.</i> |
| Grazing green feed and forage crops | ProGreen | | |
| Ewes approaching parturition | ProMark | | |
| Sheep paddock grain: supplementary feeding | ProTect S | Pellet | 25kg per tonne of ration (2.5%) (Sheep consuming no more than 500g/hd/day grain ration) |
| Lamb weaning | | | 50kg per tonne of ration (5%) |
| Sheep feedlot | | | 50kg per tonne of ration (5%) (no fibre needed in well managed feedlot) |

Storage

Store bags off the ground in a dry place out of direct sunlight and away from possible pests and insects. Store below 30C. Best used within 6 months of date of manufacture.
